Fun for a Change !

Fun for A Change is an innovation challenge that encourages youth to come up with fun ways to create positive change.

It's about getting people to "do the right thing" and change behavior by using fun and game-like motivations.

It's about thinking outside the box and rethinking how we can change the world.

Schools can host their own Fun for A Change challenge or take part in an online challenge with other schools at our online community: funforachange.org
